Application for KI-Experte / KI-Administration (AI Expert)

Dear Hiring Team,

I am writing to apply for the KI-Experte/KI-Administration position at CreaTech Engineering. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the sole developer of an agentic knowledge-extraction system for the German energy sector.

You want someone who brings AI models into existing applications with Python. That is most of what I have done. At Kniit I built multi-agent extraction with LangGraph for complex regulatory and technical documents and raised precision and recall from 33% and 45% to 93% and 90%. I also built a deterministic extraction pipeline for a second high-volume source that removed a projected $200,000 LLM cost, and an MCP query service that gives other tools millisecond-latency access to the knowledge graph. At Covestro I built a FastAPI backend and React front-end around an agentic workflow and deployed it with Docker, AWS CDK and GitLab CI/CD.

Deciding where AI is worth the effort matters as much as building it. As an AI consulting intern at Covestro I talked with business stakeholders about how they make decisions before proposing an agentic approach, and at Kniit I worked with SAP specialists and reported to the CTO. For my Master's thesis I evaluated RAG pipelines with RAGAS against ground truth from chemists, so I am used to measuring whether a solution actually helps. I have fine-tuned open-source LLMs with QLoRA, but I have not yet run a local LLM infrastructure in production, and I have no hands-on experience with the EU AI Act. I would learn both quickly and I take data protection and information security seriously.

The energy side of CreaTech's work is familiar to me from Kniit, and building the AI function of a company that helps expand broadband and renewable energy in Germany is a job I would like to do. The flat hierarchies and room to shape things that you describe suit how I work.

I am based in Regensburg and hold an EU Blue Card. My German is at B1 level and improving, and I am happy to talk through what that means for the role. I can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
