Application for Web and Artificial Intelligence Developer (m/f/d)

Dear Hiring Team,

I am writing to apply for the Web and Artificial Intelligence Developer position at Trovarit AG. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the sole developer of a knowledge-extraction pipeline with a web interface for the German energy sector.

Your role centres on generative AI, RAG and vector databases, and that is where most of my work sits. At Kniit I owned the pipeline from document ingestion and chunking through prompt engineering to indexing, and raised extraction precision and recall from 33% and 45% to 93% and 90% by running several LangGraph agents in parallel. In my Master's thesis at Covestro I designed RAG pipelines, benchmarked multilingual embedding models on more than one million data chunks and evaluated retrieval with RAGAS.

On the web side, I built the Expert Interface at Kniit, a React frontend with a Python backend on Azure that lets domain experts approve changes to the knowledge graph. At Covestro I built a React and FastAPI application for an agentic workflow, tested it with Postman and deployed it with Docker, AWS CDK and GitLab CI/CD. I have not worked with PHP professionally, but I build web applications in Python and React and expect to pick up PHP quickly. At Kniit I used Claude Code for code generation, debugging and tests, and I check its output before it ships.

Trovarit's mix of consulting and its own online tools appeals to me because the AI work starts from a real business question. At Covestro I worked with chemists and business stakeholders to understand their decisions before choosing a technical approach, and at Kniit I worked with SAP domain experts. I would like to do that kind of work for your clients and internal products.

I am based in Aachen and hold an EU Blue Card. I can start on 15 November 2026. My German is at B1 level, and I would like to talk openly about what the role needs. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
