Application for AI Engineer

Dear Hiring Team,

I am writing to apply for the AI Engineer position at Joblet-AI. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the sole developer of an agentic system built on LangGraph and Python services.

At Kniit I owned a knowledge-extraction pipeline for the German energy sector. I designed multi-agent extraction in LangGraph, with entity, relationship, consolidation and reflection agents running in parallel, and an MCP query service that exposes the knowledge graph to agents. Results were measured against ground truth from the customer's SAP system, which took precision and recall from 33% and 45% to 93% and 90%. I also replaced an expensive LLM step with a deterministic pipeline for a second high-volume source, cutting a projected $200,000 LLM budget to near zero.

On the backend side, I build Python services with FastAPI. During my AI consulting internship at Covestro I built an agentic LangGraph application that routes between vector-database queries, general inference and summarization, with a FastAPI backend and a React front-end, deployed to AWS with CDK, Docker and GitLab CI/CD. At Kniit the curation web app for domain experts runs on Azure with Python microservices.

Evaluating model quality is something I have done since my thesis, where I automated RAG evaluation with RAGAS and PytrecEval against chemist-provided ground truth and benchmarked multilingual embedding models on more than a million chunks. I have used LangChain and LangGraph, but not LlamaIndex, and I would pick it up quickly.

An agent for recruiting, where answers have to be reliable for real candidates and recruiters, is the kind of problem I like: experiment with prompts and workflows, measure the result, ship the improvement. That is why I am applying to Joblet-AI.

I am based in Germany, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
