Application for Forward Deployed Engineer

Dear Hiring Team,

I am writing to apply for the Forward Deployed Engineer position at Joblet-AI. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the sole developer of an agentic system, working side by side with domain experts rather than only with other engineers.

At Kniit I owned a knowledge-extraction pipeline for the German energy sector from discovery to deployment. I designed multi-agent extraction in LangGraph, a deterministic pipeline for a second high-volume source, and an MCP query service that exposes the knowledge graph to agents. Results were measured against ground truth derived from the customer's SAP system, which took precision and recall from 33% and 45% to 93% and 90%. I also built the curation web app (React, Python microservices, Azure) in which experts review and approve changes, so a human stays in the loop.

Evaluation and data quality have been a thread through my work. My Master's thesis at Covestro automated the evaluation of RAG systems with RAGAS and PytrecEval against chemist-provided ground truth, and I benchmarked multilingual embedding models on more than a million chunks of internal data. During my AI consulting internship I worked with business stakeholders to understand their decision-making, then built and deployed an agentic LangGraph application with a FastAPI backend and a React front-end on AWS with CDK, Docker and GitLab CI/CD.

I have not yet designed labeling systems or annotation taxonomies for training data at scale, and I have not worked with frontier labs as external partners. I would learn those quickly, since the underlying skills of structuring data, measuring quality and talking to non-engineers are ones I use every day.

The role's focus on moving partners from one-off experiments to reliable multi-turn agent workflows, with evaluation built in, is the problem I most enjoy. Working with AI labs on that, close to the research questions, is why I am applying.

I am based in Germany, hold an EU Blue Card, am fully willing to travel and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
