Application for AI-Consultant - Public & Infrastructure

Dear Ms Gryzia,

I am writing to apply for the AI-Consultant - Public & Infrastructure position at PwC Deutschland. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and I enjoy the part of the work where a business problem has to be turned into something a team can actually use.

At Covestro I worked as an AI Consulting Intern. I sat down with business stakeholders to understand how they make decisions, advised them on where agentic AI could help, and turned those requirements into a LangGraph application with a React front end and a FastAPI backend. I deployed it on AWS with CDK and GitLab CI/CD. Before that, my Master's thesis evaluated RAG systems with RAGAS and PytrecEval against ground truth from chemists, and I benchmarked multilingual embedding models on more than one million data chunks. That taught me how to judge whether an AI solution is good enough, not just whether it runs.

At Kniit I was the sole developer of a knowledge-extraction pipeline for the German energy sector. I worked with SAP domain experts and reported to the CTO, which meant translating between subject-matter people and engineering every week. I raised precision and recall from 33%/45% to 93%/90% with a multi-agent LangGraph design, and a deterministic pipeline for a second data stream cut a projected $200,000 LLM budget to near-zero running cost. Earlier models for process data at Covestro (Random Forest, XGBoost, LSTM) gave me the machine learning and data-quality grounding your posting asks for, and I work daily with Git, GitLab and cloud services on Azure and AWS.

PwC's Public & Infrastructure team advises federal, state and municipal bodies on digitalisation, the energy transition and mobility. The energy sector is the domain I know best, and I would like to bring AI into public-sector settings where data protection and bias have to be handled properly from the start. Your P&I AI Tech-Hub, which pairs consulting with hands-on technology, is the kind of setting where I can use both sides of my background.

I am based in Berlin, hold an EU Blue Card, can start on 15 November 2026 and am happy to travel to client sites. Thank you for considering my application. I would welcome a conversation.

Kind regards,

Chandu Prasad Bhairapu
