### Application for Software Developer for AI & Digital Applications

Dear Hiring Team,

I am writing to apply for the Software Developer for AI & Digital Applications position at Regnauer. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently as the only developer on a knowledge-extraction system, which is close to what you describe: take an idea, build it, and make it work for the people who use it.

At Kniit I owned the whole system myself, from data ingestion to an Expert Interface built with React and Python microservices on Azure. Domain experts used it to check and approve changes, so I spent a lot of time with them to understand how they work and what they needed. I also built a query service on the Model Context Protocol and used Claude Code and agentic workflows daily to build faster. At Covestro I built an agentic assistant with a React front end and a FastAPI backend, containerized it with Docker and deployed it to AWS with CDK and GitLab CI/CD. As an intern there I worked with business stakeholders to understand their decision-making workflows and shaped their needs into a plan for the solution.

Your point on safe AI use matches how I work. In the energy-sector project, domain experts had to validate and approve every change to the knowledge graph, so I kept data access and interfaces in mind from the start. I would bring the same care to dashboards, assistants and apps that connect to your data sources. At Covestro I also built a Streamlit dashboard for chemists, so I know what a useful tool for non-technical users needs. I work with SQL and Postgres and am happy to learn .NET and your ERP landscape from your experienced developer.

Regnauer's mix of projects, from a management dashboard to tools for site managers and a client app, is what draws me to the role. I like building software that people use every day in their own work, and a family company that has built houses since 1929 and now develops its own digital tools gives me room to do that. I am based in Munich, hold an EU Blue Card, and can start on 15 November 2026. I am happy to work on site at Lake Chiemsee. Thank you for considering my application.

Kind regards,

**Chandu Prasad Bhairapu**
