Application for Generative AI Engineer (LLMs, RAG, Python)

Dear Hiring Team,

I am writing to apply for the Generative AI Engineer position at eXperience IT Solutions. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most of it on LLMs, RAG and Python services.

RAG is the area I know best. For my Master's thesis at Covestro I designed RAG pipelines (chunking, vector databases, indexing, fine-tuning for retrieval) and built the evaluation with RAGAS and PytrecEval against ground truth from chemists. I also benchmarked multilingual embedding models on more than one million chunks of internal data. At Kniit I am the sole developer of a knowledge-extraction pipeline for the German energy sector. I built multi-agent extraction with LangGraph and LangChain, and moved precision and recall from 33% and 45% to 93% and 90%. Where an LLM was too costly, I replaced it with a deterministic pipeline and cut a projected $200,000 LLM budget to near-zero running cost.

Your posting mentions assistants that work on corporate sources across cloud and on-premise environments. At Covestro I built an agentic assistant with LangGraph, a Python FastAPI backend and a React front-end, containerized it with Docker and deployed it to AWS with CDK. At Kniit I deployed the services on Azure and exposed the knowledge graph through an MCP query service with millisecond-latency retrieval. I worked with business stakeholders in both roles, from chemists to SAP domain experts, and I am used to working with little supervision. I have not used LlamaIndex in production; my retrieval work is in LangChain, and picking up another framework is a small step.

An AI engineer who connects data, cloud and on-premise systems to language models is what I have been doing, and your team's focus on corporate assistants matches that work. A fully remote role also suits me.

I am based in Germany, hold an EU Blue Card and can start on 15 November 2026. I am happy to work remotely and to travel when needed. I read and write English fluently; I have not listed Spanish among my languages, so I would like to clarify early how much of the daily work is in Spanish. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
