ABOUT ME

Master's graduate in Artificial Intelligence with 3 years of professional experience in AI engineering and software development. Specialized in full-stack development with Python backend systems, React front-ends and AI-assisted engineering, from FastAPI services and PostgreSQL to deployment on AWS and Azure. Most recently sole developer of an agentic knowledge-extraction system and its expert web app for the German energy sector, backed by a strong foundation in machine learning and data analysis across enterprise and start-up environments.

EXPERIENCE

Associate Generative AI Developer - Agentic Indexing Pipeline Engineer for German Energy Sector

Kniit GmbH

November 2025 – present Muldestausee, Germany

- Sole developer owning a Python backend system for knowledge extraction end-to-end – data ingestion, chunking, prompt engineering, and indexing (agentic, deterministic, and monolithic strategies) – reporting directly to the CTO and collaborating with SAP domain experts across the German energy sector.
- Developed Expert Interface, an internal graph curation web app (React frontend, Python microservices backend) deployed on Azure, taking stakeholders' needs through to delivery so domain experts can validate and approve knowledge-graph changes.
- Delivered as an AI-augmented engineer – using Claude Code, custom skills, and agentic coding workflows daily to move fast on boilerplate and research, grounded in clean code principles.
- Designed and implemented a Model Context Protocol (MCP) query service exposing the knowledge graph for millisecond-latency retrieval, integrated directly into Claude Code for agentic development workflows.
- Designed and optimized multi-agent extraction algorithms (LangGraph: entity-extraction, relationship-analysis, consolidation, and reflection agents running in parallel) for knowledge extraction from complex regulatory and technical documents, driving precision/recall from 33%/45% to 93%/90% via an SAP-system-derived ground truth.
- Engineered an automated, deterministic (code-based) extraction pipeline for a second, high-volume source stream, cutting a $200,000 projected LLM budget to near-zero recurring cost while pushing extraction accuracy toward 100%.
- **Tech stack: Python, FastAPI, React, Postgres, MongoDB, Docker, Kubernetes, Azure, Claude Code, LangGraph, LangChain, LiteLLM, Neo4j, MCP**

GenAI Developer (AI Consulting Intern) - Development and Deployment of an Agentic AI Workflow

Covestro Deutschland AG

December 2024 – April 2025 Leverkusen, Germany

- Developed a React-based front-end and a Python backend with FastAPI, leveraging Postman for API testing.
- Built and containerized the entire stack with Docker and deployed it to AWS using CDK, adhering to clean code practices. Version-controlled via GitLab, with CI/CD integration.
- Designed and deployed an agentic AI application using LangGraph to optimize decision-making workflows for vector database queries, general inference, and summarization tasks.
- **Tech stack: Python(Backend), FastAPI, React(Frontend), Postman, Docker, GitLab CI/CD, GitLab, AWS, CDK, EC2, Lambda, LangGraph, LangChain**

GenAI Developer (Master's Thesis) - Evaluating the Performance of RAG Systems

Covestro Deutschland AG

May 2024 – November 2024 Leverkusen, Germany

- Automated RAG's Generation and Retrieval evaluation with RAGAS and PytrecEval, comparing model answers to chemist-provided ground truth.
- Built AWS cloud infrastructure with Lambda, SQS, and DynamoDB for PrismaChat RAG evaluation using CDK.
- Benchmarked multilingual embedding models on over 1M data chunks of Covestro's internal chemical data.

- Designed RAG pipelines, focusing on chunking strategies, vector databases, indexing, and fine-tuning models for optimized retrieval.
- **Tech stack: Python, Scikit-Learn, PyTorch, TensorFlow, LangChain, Hugging Face Transformers, RAGAS, PytrecEval, AWS (S3, EC2, VPC, Lambda, SQS, DynamoDB, CDK), Azure AI Search, Docker, Streamlit, Vector Databases**

Data Scientist (Intern) – ML-Based Prediction of Prepolymer Synthesis Outcomes

Covestro Deutschland AG

November 2023 – April 2024 | Leverkusen, Germany

- Built and compared Random Forest, XGBoost, and LSTM models to predict prepolymer synthesis outcomes (e.g. viscosity, reaction progression) from time-series process data, evaluating tree-based vs. deep learning approaches for this tabular/temporal hybrid problem.
- Engineered lag features and rolling statistical windows from raw sensor time-series (temperature, reaction time, process variables) to feed the tree-based models, while feeding raw sequences directly into the LSTM.
- Benchmarked model performance against traditional empirical curve-fitting methods, improving early identification of batches likely to deviate from target specification.
- Deployed an interactive Streamlit dashboard exposing model predictions to chemists in real time, letting them simulate parameter changes and see predicted outcomes before running physical batches.
- **Tech stack: Python, Scikit-Learn, XGBoost, TensorFlow/Keras, Pandas, NumPy, SciPy, Matplotlib, Streamlit**

Machine Learning Engineer - Electrical Vehicle Load Forecasting using Time Series Analysis

Cognizant Technology Solutions

September 2021 – March 2022 | Hyderabad, India

- Developed ARIMA, SARIMA, XG-Boost regressor, FB Prophet, LSTM models for time series analysis for EVs.
- Developed LSTM, achieved 96% test accuracy and strong performance on unseen data.
- **Tech stack: Python, Scikit-Learn, TensorFlow**

PROJECTS

Project: Collections Ops Workbench | Python | FastAPI | PostgreSQL | React | TypeScript

- Internal tools for operations teams, built over synthetic loan-account data: FastAPI service with a PostgreSQL schema and migrations, and a React and TypeScript UI with work queues for underwriting and collections, workflow automation of customer messages (LLM drafts for agent approval), and a CI/CD pipeline with automated tests.

TECHNICAL SKILLSET

- **Programming:** Python
- **Version Control:** Git, GitLab
- **Programming Tools/Frameworks:** FastAPI, React(beginner), Postman, Docker, CI/CD (GitLab CI/CD), AI-assisted development (Claude Code), Agentic Workflow(LangGraph), NLP (LangChain, Hugging Face transformers, NLTK), Machine Learning (Scikit-Learn), Deep Learning (PyTorch, TensorFlow)
- **Databases:** Relational databases (SQL, PostgreSQL), MongoDB, Neo4j, Vector Databases(Qdrant, Pinecone, Azure AI Search)
- **Cloud technologies:** AWS- S3, EC2, Lambda, SQS, Load balancer, DynamoDB, VPC, CDK
- **Methodologies:** Agile

EDUCATION

Master of Science in Artificial Intelligence — March 2022 – April 2025
Technische Hochschule Würzburg-Schweinfurt, Würzburg, Germany

Minor in Computer Science & Engineering — July 2019 – July 2021
G Pulla Reddy Engineering College, Kurnool, India

Bachelor of Technology in Mechanical Engineering — August 2017 – July 2021
G Pulla Reddy Engineering College, Kurnool, India

LANGUAGES

German (B1) | English (Business Fluent) | Hindi (Fluent) | Telugu (Native)
