Application for Founding Engineer (m/w/d)

Dear Mr Vogel,

I am writing to apply for the Founding Engineer position at Vogel. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, and for the past year I have been the sole developer of a system that domain experts actually use, at a start-up where there was nobody else to hand the data, the backend or the agents to.

At Kniit I built a knowledge-extraction system for the German energy sector end to end and reported to the CTO. The pipeline pulls in regulatory and technical documents, and four LangGraph agents extract entities and relationships from them. I measured it against a ground truth built from SAP data rather than against test examples I wrote myself, and precision and recall went from 33% and 45% to 93% and 90%.

The question in your posting about what the model judges and what is calculated is one I had to answer in practice. For a second, high-volume source I removed the model calls and wrote deterministic code, which cut a projected $200,000 LLM budget to almost nothing and pushed accuracy toward 100%. The model stayed where language needed judgment. I also built Expert Interface, a web app on Azure where SAP domain experts check and approve changes to the knowledge graph before they are applied, which is close to your idea that a certified professional signs off on what an agent produces.

AI is my everyday tool: I write, review and test code with Claude Code and custom skills, and I have learned where it confidently gets things wrong. I write production code in Python and work with SQL and Postgres; TypeScript is still a gap; my front-end work so far is React at beginner level.

I have no tax or DATEV background, and my German is at B1 level, not yet the language of advisors' daily work. I would close that gap the way your posting suggests, by sitting with advisors on real cases. What draws me to Vogel is that the data is real and audited, the users are colleagues down the hall, and every acquired firm makes what you build matter more.

I will be based in Munich, can work from your office daily, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
