Application for Machine Learning Engineer

Dear Hiring Team,

I am writing to apply for the Machine Learning Engineer position at Beff. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, including machine learning on industrial process data, which is close to the production data your AI team handles.

At Covestro I worked as a Data Scientist (Intern) on sensor time-series from chemical synthesis. I built lag features and rolling windows, compared Random Forest, XGBoost and an LSTM, benchmarked them against empirical curve-fitting, and gave chemists a Streamlit dashboard to simulate parameter changes before running a physical batch. Earlier, at Cognizant, I built ARIMA, SARIMA, Prophet and LSTM models for EV load forecasting.

Taking systems from prototype to production is what I do now. At Kniit I was the sole developer of a knowledge-extraction pipeline for the German energy sector, owning ingestion, evaluation against ground truth and deployment on Azure, and raised precision/recall from 33%/45% to 93%/90%. In my Covestro thesis I automated RAG evaluation with RAGAS on AWS (CDK, Lambda, SQS) over more than a million chunks, and in my consulting internship I shipped an agentic LangGraph app with Docker and GitLab CI/CD. I work in Python with PyTorch and TensorFlow, and I have used LangChain and vector databases for LLM and RAG work.

I should be open about one point: I have not yet led a team of ML engineers, and I have less production experience with dedicated MLOps tooling for experiment tracking and workflow orchestration. I would bring ownership of the systems I build and a habit of testing and documenting them.

Beff's Beff Navigator platform connects battery development, production data and quality analysis, and the new collaboration with Mitsubishi Fuso shows it is being used on real vehicle programmes. Turning that production data into reliable models is a problem I want to work on.

I am based in Stuttgart, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
