Application for AI Developer: AI Applications and LLM Agents

Dear Ms. Schäfer,

I am writing to apply for the AI Developer position (AI applications and LLM agents) at DZ BANK. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently multi-agent LLM systems that run in production for the German energy sector.

At Kniit I was the sole developer of an agentic knowledge-extraction pipeline and reported directly to the CTO. I built the multi-agent extraction in LangGraph, with entity, relationship, consolidation and reflection agents running in parallel, and measured it against ground truth derived from SAP systems. Precision and recall went from 33% and 45% to 93% and 90%. That is the kind of work you describe: a multi-LLM agent system for a specialist domain, with evaluation built in. I also wrote an MCP query service that exposes the knowledge graph to agents, and a deterministic extraction path that replaced a projected $200,000 LLM budget.

Your role sits between a business unit and IT, and that is familiar to me. At Kniit I worked with SAP domain experts and built a web app (React, Python microservices, Azure) so they could approve changes themselves. At Covestro I spoke with business stakeholders about their decision-making workflows and advised them on how agentic AI could help. There I built and deployed an agentic application with LangGraph, FastAPI and React, containerised it with Docker and shipped it to AWS with CDK and GitLab CI/CD. My thesis on evaluating RAG systems at Covestro covered AWS infrastructure and benchmarking embedding models on over a million chunks of data.

I am interested in DZ BANK because agentic AI in risk controlling has to be secure and compliant as well as clever, and you want someone to build the technical foundations together with IT. I have not worked in banking yet, and I would approach the domain by working closely with your risk and finance specialists, the way I did with energy and chemical experts.

I am based in Frankfurt am Main, hold an EU Blue Card, and can start on 15 November 2026. I am happy to travel when the work needs it. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
