Application for AI Innovation Analyst

Dear Hiring Team,

I am writing to apply for the AI Innovation Analyst position at UNDP. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most of it for business users who needed a tool they could rely on.

At Kniit I was the sole developer of an agentic knowledge-extraction system for the German energy sector, reporting to the CTO and working with SAP domain experts. I built multi-agent LLM pipelines in Python with LangGraph, checked the output against ground truth from the SAP system, and raised precision and recall from 33% and 45% to 93% and 90%. I also built the web app on Azure that lets the experts review and approve changes before they go into the knowledge graph. That kind of human check on AI output is part of how I work, and it is close to the risk monitoring your posting describes.

During my AI Consulting internship at Covestro I met with business stakeholders, learned how they make decisions, and advised on where agentic AI could help. I then designed and deployed the application with LangGraph, a React front end and a FastAPI backend, containerised with Docker and deployed to AWS. My Master's thesis there covered the evaluation of RAG systems with RAGAS and PytrecEval, and I have fine-tuned open-source LLMs with QLoRA. I have also written the prompts and integrations behind these systems, so ChatGPT-style models are familiar territory.

I have not worked in a UN setting, and I have not used C# or GCP in a job. My front-end work in React is at a beginner level. I do know Python, Azure and LLM tooling well, and I pick up new stacks quickly. What draws me to the role is the chance to put AI to work on operational problems for country offices in many countries, with ethics and risk built into the design from the start.

I am based in Bonn, hold an EU Blue Card, and can start on 15 November 2026. I am happy to travel when the work needs it. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
