Application for KI-Entwickler (m/w/d) - Azure & LLM Integration

Dear Hiring Team,

I am writing to apply for the KI-Entwickler (m/w/d) - Azure & LLM Integration position at WGV Versicherung. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, most recently RAG and agent pipelines that run on Azure.

The search-and-answer work in your posting is close to what I do every day. At Kniit I am the sole developer of a knowledge-extraction pipeline for the German energy sector: ingestion, chunking, prompt engineering, indexing and vector search, with LangGraph agents that raised precision/recall from 33%/45% to 93%/90% against a ground truth taken from SAP systems. In my Master's thesis at Covestro I designed RAG pipelines, compared multilingual embedding models on over one million chunks and used RAGAS and PytrecEval to measure retrieval and answer quality. That work included Azure AI Search.

On the backend side I build Python services with FastAPI. At Covestro I wrote the API for an agentic application and tested it with Postman. At Kniit I built a graph curation web app with a Python microservices backend on Azure, so domain experts can approve changes themselves. My CV also lists a small Azure document assistant project (Document Intelligence, AI Search, Azure OpenAI behind an asynchronous FastAPI service), which shows how I would approach the stack you describe. I have not yet migrated an on-premises AI system to Azure, and the EU AI Act is new ground for me, but I have deployed to the cloud with Docker, CDK and GitLab CI/CD and I value evaluation and traceability.

An insurer that puts text generation, document recognition and search into its own applications, and wants them to meet the EU AI Act from the start, gives an AI developer real engineering work with clear responsibility. That combination is what I am looking for.

I am based in Stuttgart, hold an EU Blue Card and can start on 15 November 2026. Thank you for considering my application. I would be glad to talk through the details.

Kind regards,

Chandu Prasad Bhairapu
