Application for Backend Engineer - AI Agents

Dear Hiring Team,

I am writing to apply for the Backend Engineer - AI Agents position at Lime Connect. I have a Master's in Artificial Intelligence and three years of experience building and deploying AI applications, mostly Python backends around LLM agents, tool calling and retrieval.

At Kniit I was the sole developer of a multi-agent LangGraph pipeline that extracts knowledge from regulatory documents for the German energy sector. I measured it against ground truth from SAP systems and raised precision and recall from 33%/45% to 93%/90%. I also built an MCP query service on top of the result and plugged it into Claude Code, so tool design and context are things I have worked on directly. LiteLLM is part of that stack, which helps when a team wants to switch between LLMs.

Evals are where I have spent most of my time. For my Master's thesis at Covestro I automated RAG evaluation with RAGAS and PytrecEval against chemist-provided ground truth, and I benchmarked multilingual embedding models on over a million chunks. At Kniit the same habit decided which extraction strategy we kept: agentic where it paid off, plain code where it did not, which removed a projected $200,000 LLM budget. I have not used Langfuse in a customer product yet, but the approach carries over.

Your posting says AI is the core of what you build and that Connect AI already automates most customer inquiries. I would like to work on that kind of product, close to Product and with real conversations as the test set. At Covestro I deployed an agentic LangGraph application with FastAPI, Docker and AWS CDK, working with business stakeholders, so the step from idea to running service is familiar.

To be open about it: I have three years of experience, not five, I have not used Django, and my German is B1, below the fluent level you ask for. I would close these gaps through hands-on delivery, and I am comfortable working in English.

I am based in Cologne, available from 15 November 2026 and hold an EU Blue Card. Thank you for considering my application.

Kind regards,

Chandu Prasad Bhairapu
