ABOUT ME

Master's graduate in Artificial Intelligence with 3 years of professional experience in AI engineering and software development. Specialized in agentic systems, RAG pipelines and LLM applications that run in production, working directly with business stakeholders and domain experts. Most recently sole developer of an agentic knowledge-extraction system for the German energy sector, backed by hands-on work with Python, Docker and cloud deployment on AWS and Azure.

EXPERIENCE

Associate Generative AI Developer - Agentic Indexing Pipeline Engineer for German Energy Sector

Kniit GmbH

November 2025 – present | Muldestausee, Germany

- Sole developer owning the full knowledge-extraction pipeline end-to-end – data ingestion, chunking, prompt engineering, and indexing (agentic, deterministic, and monolithic strategies) – reporting directly to the CTO and collaborating with SAP domain experts across the German energy sector.
- Designed and optimized multi-agent extraction algorithms (LangGraph: entity-extraction, relationship-analysis, consolidation, and reflection agents running in parallel) for knowledge extraction from complex regulatory and technical documents, driving precision/recall from 33%/45% to 93%/90% via an SAP-system-derived ground truth.
- Developed and deployed Expert Interface, a graph curation web app (React frontend, Python microservices backend, Docker and Kubernetes stack) on Azure, enabling domain experts to validate and approve knowledge-graph changes.
- Engineered a deterministic (code-based) extraction pipeline for a second, high-volume source stream, cutting a $200,000 projected LLM budget to near-zero recurring cost while pushing extraction accuracy toward 100%.
- Designed and implemented a Model Context Protocol (MCP) query service exposing the knowledge graph for millisecond-latency retrieval, integrated directly into Claude Code for agentic development workflows.
- Delivered as an AI-augmented engineer – leveraging Claude Code, custom skills, and agentic coding workflows for rapid, high-quality development grounded in clean code principles.
- **Tech stack: Python, LangGraph, LangChain, LiteLLM, RAG, GraphRAG, Vector Search, MCP, FastAPI, Docker, Kubernetes, Azure, Postgres, MongoDB, Neo4j, React**

GenAI Developer (AI Consulting Intern) - Development and Deployment of an Agentic AI Workflow

Covestro Deutschland AG

December 2024 – April 2025 | Leverkusen, Germany

- Containerized the entire stack with Docker and deployed it to AWS using CDK as Infrastructure as Code, adhering to clean code practices. Version-controlled via GitLab, with CI/CD deployment pipelines.
- Worked with business stakeholders on their decision-making workflows and designed and deployed an agentic AI application using LangGraph for vector database queries, general inference, and summarization tasks.
- Developed a React-based front-end and a Python backend with FastAPI, leveraging Postman for API testing.
- **Tech stack: Python, AWS, CDK, EC2, Lambda, Docker, GitLab, GitLab CI/CD, FastAPI, React, LangGraph, LangChain, Postman**

GenAI Developer (Master's Thesis) - Evaluating the Performance of RAG Systems

Covestro Deutschland AG

May 2024 – November 2024 | Leverkusen, Germany

- Built serverless AWS cloud infrastructure with Lambda, SQS, and DynamoDB, defined as code with CDK, for PrismaChat RAG evaluation.
- Automated RAG's Generation and Retrieval evaluation with RAGAS and PytrecEval, comparing model answers to chemist-provided ground truth.
- Benchmarked multilingual embedding models on over 1M data chunks of Covestro's internal chemical data.

- Designed RAG pipelines, focusing on chunking strategies, vector databases, indexing, and fine-tuning models for optimized retrieval.
- **Tech stack: Python, AWS (EC2, VPC, Lambda, SQS, DynamoDB, CDK), Docker, Azure AI Search, LangChain, Hugging Face Transformers, RAGAS, PytrecEval, PyTorch, Vector Databases**

Data Scientist (Intern) – ML-Based Prediction of Prepolymer Synthesis Outcomes

Covestro Deutschland AG

November 2023 – April 2024 | Leverkusen, Germany

- Built and compared Random Forest, XGBoost, and LSTM models to predict prepolymer synthesis outcomes (e.g. viscosity, reaction progression) from time-series process data, evaluating tree-based vs. deep learning approaches for this tabular/temporal hybrid problem.
- Engineered lag features and rolling statistical windows from raw sensor time-series (temperature, reaction time, process variables) to feed the tree-based models, while feeding raw sequences directly into the LSTM.
- Benchmarked model performance against traditional empirical curve-fitting methods, improving early identification of batches likely to deviate from target specification.
- Deployed an interactive Streamlit dashboard exposing model predictions to chemists in real time, letting them simulate parameter changes and see predicted outcomes before running physical batches.
- **Tech stack: Python, Scikit-Learn, XGBoost, TensorFlow/Keras, Pandas, NumPy, SciPy, Matplotlib, Streamlit**

Machine Learning Engineer - Electrical Vehicle Load Forecasting using Time Series Analysis

Cognizant Technology Solutions

September 2021 – March 2022 | Hyderabad, India

- Developed ARIMA, SARIMA, XG-Boost regressor, FB Prophet, LSTM models for time series analysis for EVs.
- Developed LSTM, achieved 96% test accuracy and strong performance on unseen data.
- **Tech stack: Python, Scikit-Learn, TensorFlow**

PROJECTS

Project: Multi-Tenant RAG Service | Python | FastAPI | LiteLLM | vLLM | Qdrant | Docker

- RAG service with per-tenant isolation in the vector database, streamed answers with citations, multiple LLM providers via LiteLLM with an open-source fallback served with vLLM, RAGAS eval in CI, Docker Compose.

TECHNICAL SKILLSET

- **Programming:** Python, SQL | **Version Control:** Git, GitLab, GitLab CI/CD | **Methodologies:** Agile
- **GenAI & Agents:** LangGraph, LangChain, LiteLLM, RAG, GraphRAG, Hugging Face Transformers, MCP, RAGAS, QLoRA
- **ML Frameworks:** PyTorch, TensorFlow, Scikit-Learn, XGBoost, Pandas
- **Databases:** Vector Databases (Qdrant, Pinecone, Azure AI Search), Postgres, MongoDB, Neo4j
- **Cloud & Deployment:** Docker, Kubernetes, AWS (EC2, Lambda, SQS, DynamoDB, VPC, CDK), Azure, FastAPI

EDUCATION

Master of Science in Artificial Intelligence — March 2022 – April 2025
Technische Hochschule Würzburg-Schweinfurt, Würzburg, Germany

Bachelor of Technology in Mechanical Engineering — August 2017 – July 2021
Minor in Computer Science & Engineering
G Pulla Reddy Engineering College, Kurnool, India
